1. INTRODUCTION

1.1 School of Health and Social Services

The School of Health and Social Services is part of the College of Humanities and Social Sciences, with campuses at Albany (Auckland), Turitea (Palmerston North) and Wellington. The ProVice-Chancellor of the College is Professor Susan Mumm, the Director of Academic Programmes is Dr Jenny Coleman, and the Director of Teaching and Learning is Dr Ute Walker. Both are based in the College Office on the Turitea campus. The Head of School is a rotating position for a period of 3-5 years and may be based on any of the campuses.

The School of Health and Social Services provides health and social services programmes in nursing, rehabilitation, social work and social policy from undergraduate to doctorate level. The focus of the health focused programme is on improving the health and well-being of New Zealanders through the development of knowledge and skills and research-based teaching.

See Appendix 1 for contact details of staff.

1.2 The purpose of the guide

This guide aims to provide you with background information on undertaking postgraduate research reports, projects or theses, including report writing and research supervision. It also contains information on policies regarding the allocation of supervisors, student-supervisor contracts and expectations of both parties. A list of recommended reading is included at the end of the guide. You need to be aware of University policies, such as that of applying to carry forward course work. Details about how to access these policies and the regulations pertaining to degrees are included in this book.

As a student you need to be aware of the facilities and processes designed to support your study. Many of these are outlined within this booklet and you will also be given additional information within your research paper (168.810 or 179.702) and by your supervisor. This *Postgraduate Handbook and Research Guidelines* booklet should be read in conjunction with the following resources:

College of Humanities and Social Sciences Postgraduate Handbook (2011)

Available at http://www.massey.ac.nz/massey/learning/colleges/college-humanities-social-sciences/study/postgrad/pg_admin_booklets.cfm

Massey University Postgraduate Guidebook (2007)

Available at http://www.massey.ac.nz/massey/research/phd-administration/doctoral-degree-administration/postgraduate-guidebook/postgraduate-guidebook_home.cfm

Massey University (2010). *Code of ethical conduct for research, teaching and evaluation involving human participants*. Palmerston North: Author. Available at <http://www.massey.ac.nz/massey/fms/Human%20Ethics/Documents/MUHEC%20Code%202010.pdf>

Guide to presentation of theses. Available at <http://www.massey.ac.nz/massey/research/library/help-and-instruction/theses/en/thesis-presentation-guide.cfm>

1.3 Directors of Programmes

The Director of Nursing Programmes is Associate Professor Annette Huntington (Wellington Campus). The Director of Social Work and Social Policy is Dr Kieran O'Donoghue (Palmerston North Campus). The Coordinator for Health studies is Dr Suzanne Phibbs. Dr Gretchen Good is the Coordinator for the MA (Rehab).

1.4 Research Discussion Days

Research Discussion Days / Thesis Days are scheduled to support students and their research efforts.

Turitea or Wellington campus: Discussion days for Master's thesis students are organised at the beginning of the year and normally held at the Turitea Campus.

Albany campus: Please check on the school website for dates, location and contact staff member.

Purpose of the Research Discussion Days / Thesis Days

These days are designed to:

- Introduce you to the research culture of the School of Health and Social Services.
- Develop peer support for your research and the process.
- Allow you to identify and receive input on the research skills and issues for your particular research.
- Enable you to develop skills to discuss, provide and receive feedback on research.
- Give you time to work with your supervisor, as many of you are studying from a distance.
- Provide you with the opportunity to use the resources around the university e.g. Library, computing services, student learning support.

1.5 Graduate News

The School website provides information about developments within the School, important dates, events and news.

2. ON-CAMPUS FACILITIES FOR STUDENTS

2.1 School of Health and Social Services facilities

Students have access to a number of facilities.

On the **Palmerston North** campus these include:

- Access to shared postgraduate study space including shared computers and a printer
- Access to a telephone for local calls.
- Arrangements for URGENT messages to be relayed to you by office staff during office hours.
- Students can arrange a hotmail.com personal email address.
- Full-time students can obtain after hours access cards for the Social Sciences Tower. The card and keys for the postgraduate study space can be obtained from the secretarial staff at the beginning of the semester. Please note that it will take up to a week to organise your access card and keys.

On the **Albany** campus student facilities include:

- Access to a telephone for local calls;
- Arrangements for URGENT messages to be relayed to you by office staff during office hours;
- Access to a graduate study room;
- Free bus shuttle service running at regular intervals between the upper and lower campuses;
- College postgraduate student study-room facilities. See the Contact Centre, Quad A, for an access application form;
- Health, counselling and chaplaincy services;
Brasserie (Atrium) and Coffee kiosk (Quad Block courtyard); Coke machine (lower level Atrium) and cafeteria on lower campus.

On the **Wellington** campus student facilities include:

- A College Postgraduate Room for students undertaking fulltime research and writing. A permission form has to be filled out by the student and signed off by both the Head of School (or delegate) and the College Regional Director. Each student has their own desk and workspace and computer (provided by their School), with IT services and software similarly available to staff and computer labs. Access is 24 hours a day, 7 days a week (students are given a swipe card for the building for after-hours and weekends).
- Access to a telephone for local calls.
- Arrangements for URGENT messages to be relayed to students by office staff during office hours.

An outline of University wide student services, including health and counselling services can be found at http://www.massey.ac.nz/massey/student-life/services-students/student-services_home.cfm

Self-Service Photocopy services are available in the **Library**.

3. ASSESSMENTS & ASSIGNMENTS

3.1 Assignments

A range of types of assessments is used and you will be notified of the specific requirements for each paper. These will also be discussed at the Block Course days and you can contact the paper co-ordinator for further information.

Assignments at postgraduate level should, in general, demonstrate:

- An extensive independent literature review.
- Critical use of all literature.
- Use of current research findings.
- Application to practice.

The types of assessment used in practicum papers will be specified within those individual papers.

Submission and Return of Assignments

Unless otherwise advised completed assignments are to be posted to NSATS. If you are requested to send your assignment directly to the paper co-ordinator please attach an **Assignment Cover Sheet** (Appendix 2) to your assignment. It is important that you retain a copy of your assignment until it has been marked and returned to you. Assignments sent as email attachments or faxes cannot be accepted at this stage.

Assignments are marked and returned as soon as possible so that you can make use of the comments into your future work. Please allow three (3) weeks from the due date for return of assignments, and if your work has not been received after this time, contact the paper co-ordinator. It is important to note that the specified timeframe applies only to those assignments submitted by the due date and does not necessarily apply to those submitted late.

Assignment Due Dates

A set of due dates for assignments will be provided and it is expected that these dates will be seen as a contract between you and the paper co-ordinator. **If you are unable to meet these deadlines, then please contact the paper co-ordinator before the due date.** Specific regulations regarding the use of extensions, if available, will be provided by each paper co-ordinator.

Grading of Assessments

Practica

Practica are graded as pass or fail only.

Other Papers

The requirements for a pass will be outlined clearly at the commencement of the paper.

GPA Unit Value	Grade	Comment
9	A+	Outstanding
8	A	
7	A-	Very Good
6	B+	Good
5	B	Competent
4	B-	
3	C+	
2	C	Acceptable
	D	Fail
	E	

Written Assignment Presentation

Unless otherwise notified assignments should be typed or word-processed using:

- Size 12 font.
- Double-spacing.
- A 4-cm margin on the left hand side.
- All pages numbered and named.
- A School of Health and Social Services Assignment Cover Sheet must also be attached.

Referencing

The American Psychological Association (APA) referencing style is used in this School. The *Publication Manual of the American Psychological Association* (6th ed.) is a useful resource, which you should consider

purchasing. You may also like to check the website at: <http://apastyle.apa.org> and the resources at massy university online writing and learning link at <http://owll.massey.ac.nz>.

Paper Results

Results are posted to you from Registry at the end of semesters or can be accessed from: <http://www.mymassey.com/>

Repeat Assessments

With the paper co-ordinator / lecturer's approval, one failed assignment in a paper may be reworked and resubmitted. The maximum mark that can be awarded on a resubmitted assignment is 50%. This must be resubmitted before the final due date for work in that paper.

Extensions and Late Assignments

The majority of students submit written assignments according to the due dates required. However, when some students frequently seek to extend the due date for written work, those students submitting on time might argue that they are being disadvantaged. In order that the majority of students do not feel penalised by submitting work on time, each Campus has a policy concerning late submission of assignments. Students will be informed of the policy at the commencement of each paper. Please note that if you are posting your work, it may be posted on the due date, but must show a date stamp on the envelope.

Extensions

An extension on the due date for an assignment will only be permitted when circumstances make it extremely difficult or impossible for you to submit your work on time, for example in the case of bereavement or serious illness. An extension must be negotiated with the paper lecturer and requested in writing **at least three days prior to the due date**. The date for submission must be negotiated and stated. If the assignment is not submitted by the extended date, a penalty may be incurred.

Late Assignments

Where an extension has not been sought, a penalty may be incurred. An assignment for which an extension has not been sought, and which is submitted more than two weeks past the due date may not be assessed.

Please note: There may be some variation on assignment submission, extension and marking. This will be notified to students in writing by any paper co-ordinator who wishes to use a variation of the policies listed here.

3.2 Graduate Marking Guide

Unless otherwise notified, the table on p.13 provides the framework for the assessment of submitted work.

- ◆ The SCOPE and CONTENT of the assessment provides 60% of the grade.
- ◆ The STRUCTURE provides 20%.
- ◆ Use of LITERATURE and accurate REFERENCING provides a further 15%.
- ◆ PRESENTATION provides a maximum of 5%.

Remarking of Assignments

If you believe that your assignment has not been marked fairly, or you require clarification of the grade given, then you may request that the paper co-ordinator arrange for the assignment to be remarked. These must be resubmitted before the final due date for all work in that paper. To facilitate this process, please send all of the following to the paper co-ordinator:

- ◆ The **marked** copy and an **unmarked** copy of the assignment;
- ◆ A letter detailing your concerns.

An independent person will then mark the assignment and you will be provided with that person's marking feedback and comments.

Plagiarism

Plagiarism is the use of another person's work or idea as if it is your own. The other person may be an author, critic, lecturer or another student. When it is desirable or necessary to use other people's material, take care to include appropriate references and attribution – do not pretend the ideas are your own. Be sure not to plagiarise, intentionally or otherwise. Any candidate found guilty of plagiarism will be liable to the penalties listed under Regulation 7, Dishonesty in any Assessment or Examinations in the Massey University 2011 Calendar available at:

<http://www.massey.ac.nz/massey/about-massey/calendar/statutes-and-regulations/en/assessment-and-examination-regulations.cfm>

4. WITHDRAWAL, RECOGNITION OF PRIOR LEARNING & CREDITS INTO PROGRAMMES

4.1 Withdrawal

For information on withdrawal from taught papers and thesis papers see p. 46 and 47 in the College of Humanities and Social Sciences Handbook (2011) and the Massey University 2011 Calendar Enrolment Regulations available at <http://www.massey.ac.nz/massey/about-massey/calendar/statutes-and-regulations/enrolment-regulations.cfm>

4.2 Recognition of Prior Learning and Credits into Programmes

For information about Recognition of Formal and Informal Prior Learning see the information at the Massey University 2011 Calendar available at <http://www.massey.ac.nz/massey/about-massey/calendar/statutes-and-regulations/recognition-of-prior-learning.cfm>

GRADUATE MARKERS GUIDE

NB: This is not a specific marking guide for individual assessment requirements

Fail, D	C/C+	B- / B / B+	A- / A / A+
0-49%	50-59%	60-74%	75-100%

SCOPE 60%

Unreflective. Totally personal comment. Incoherent argument. Complete misinterpretation of topic.	Topic not fully covered. Discussion too brief. Overuse of quotations, with literature. Inappropriate literature used.	A balanced overview of the issues, as reflected in the course study materials. Some explanation, illustration and support is provided from the literature. Material relevant to the topics is explored. The essay is easy to read.	A fuller, more systematic exploration of the topic, which may include an attempt at critical comment or appraisal.	Comprehensive exploration of the topic, with sound analytical comment and a personal synthesis of the issues shown.
---	---	--	--	---

STRUCTURE 20%

Structure confused, not discernible, not explained.	Opening paragraph not clear, major points not evident.	Introduction: Main arguments, approach/thesis is outlined in opening paragraph. Definitions are provided in context. Body: Main points discussed, logically sequential paragraph, thesis well developed. Summary/Conclusion: The final paragraph is unambiguous, valid and meaningful. Paragraph structure has topic sentence, supporting sentences and lead sentence.	Main point elaborated.	Critical evaluations.
---	--	--	------------------------	-----------------------

EVIDENCE OF READING 15%

No evidence of reading in the text of the essay. No citations or references.	Reading not well integrated into the text of the essay. Limited citations and references.	The essay shows evidences that course materials have been read. An accurate reference list is attached (using APA method). <i>APA (American Psychological Association) reference style is a requirement.</i>	Extra references included, evidence of extra reading.	Extra references integrated into the argument. Broad and comprehensive reading in evidence.
--	---	---	---	---

PRESENTATION 5%

Major flaws in presentation. Plagiarism is a University disciplinary matter. NB: Fail may be resubmitted (rewrite).	Major flaws in presentation.	Most presentation details are met, e.g. title, page (A4 paper), margin, clear, headers, font, legible, punctuation and spelling correct.	Few flaws in presentation.	Virtually flawless presentation.
--	------------------------------	--	----------------------------	----------------------------------

5. RESEARCH

5.1 Research Areas

The long-term aim of the School is to encourage all new research students to choose a topic within an established School research programme. This will enable the School to provide a pool of expertise for research, consultancy and supervision. In addition, it will enable the School to apply for funding to finance the projects.

At present research areas include women's health, quality of life, Maori development within health and social services, the clinical work environment of nurses, primary health care practice, vulnerable populations, healthy ageing and older adult health issues, health information technology, ethics, family interventions, workforce issues, advanced nursing practice, chronic illness, rehabilitation outcomes, assessing clinical indicators such as in gambling treatment, mental health and addiction and exploration of issues related to immigrant and refugee health, children and adults with vision impairment, social work practice, the social work profession, social service supervision, management and organisations, and issues pertaining to social exclusion, social problems and social policy.

5.2 School Specifications

The following requirements have been set for the projects and theses undertaken by Masters or BA (Hons) students:

5.2.1 Research Report of 30 credits

(168.895, 179.899 or 279.796)

- Is small and focused, usually on a clinical practice issue.
- Utilises a single method or methodology.
- Is a complete piece of work of 10,000 – 15,000 words (8,000 – 10,000 for Social Work and Social Policy reports).
- Is usually a low –risk pilot or small scale study
- Is completed in one year or less.
- A complete first draft should be submitted by the end of September of the year of enrolment.
- Rework the report as required and make the required changes, additions and corrections. This step takes considerable time and energy and the time required should not be underestimated.
- Spiral bound prior to examination.
- Submit two copies for assessment by the 30th November if you wish to graduate in the April or May graduation ceremonies or no later than 31 January following the year of enrolment. Please note your supervisor(s) will not be available over the Christmas /New Year period.
- **Complete at least one co-authored article for publication with your supervisor.**

5.2.2 Research Project of 60 credits

(168.896)

- Is small and focused, usually on a clinical practice issue.
- Utilises a single method or methodology.
- Is a complete piece of work of approximately 15,000 – 20,000 words.
- Is completed in one year.
- A complete first draft should be submitted by the end of September of the year of enrolment.
- Rework the report as required and make the required changes, additions and corrections. This step takes

considerable time and energy and the time required should not be underestimated.

- Spiral bound.
- Submit two copies for assessment by the 30th November if you wish to graduate in the April or May graduation ceremonies or no later than 31 January following the year of enrolment. Please note your supervisor(s) will not be available over the Christmas /New Year period.
- **Complete at least one co-authored article for publication with your supervisor.**

5.2.3 The Thesis of 120 credits

(147.816 or 168.899 or 177.899 or 168.816 & 168.817 or 177.816 & 177.817, or 147.816 & 147.817, 179.899 or 279.899, or 179.800 or 279.800)

- Is a larger focused study.
- Utilises a single method or methodology.
- Is a complete piece of work of approximately 30,000 -35,000 words.
- May replicate another study.
- May be a descriptive study.
- Should be completed in one year full-time or two years part-time.
- A complete first draft should be submitted by the end of September of the final year of enrolment.
- Rework the thesis and make final changes and corrections. This step takes considerable time and energy and the time required should not be underestimated.
- Submit three soft bound copies by the 31st October if you wish to graduate in the April or May graduation ceremonies or no later than 31 January following the year of enrolment. Please note, your supervisor(s) will not be available over the Christmas /New Year period.
- Is bound as per the Massey University Library - *Guide to the presentation of theses*.
- **Complete at least one co-authored article for publication with your supervisor.**

5.2.4 Part A of the thesis for part-time students

(147.816 / 168.816 / 177.816/ 179.816/ 279.816)

Students enrolled in their thesis on a part-time basis usually do so by enrolling in Part A in the first year and Part B in the second year. You may not carry forward postgraduate registration for Part A but may seek re-enrolment in Part B if the thesis has not been completed before the end of the next enrolment period.

What are you expected to achieve during the first year of your enrolment, i.e. Part A.

- Select a suitable research problem or area of study.
- Undertake a literature review to determine the necessity for the research. The literature review should be written and could form the basis of the first chapter or the literature chapter itself.
- Write about the chosen method or methodology.
- Prepare a research proposal that may be scientifically assessed by School staff (see later section on research proposals).
- Develop an ethics proposal if required (see later section on ethical approval).
- Start data collection towards the end of the year and over the summer period.

5.3 Part B of the thesis for part-time students

(147.817 / 168.817 / 177.817/ 179.817/279.817)

During Part B students should:

- Complete data collection.
- Analyse data.
- Interpret data.
- Continue the writing up of your thesis. **Note: Writing should take place throughout the course of your research.** This should prevent “writer’s block” occurring at a crucial point in the process.
- Aim to submit a complete first draft to your supervisor by the end of August.
- Rework the thesis as required and make the required changes, additions and corrections. This step takes considerable time and energy and the time required should not be underestimated.
- Submit a final draft to your supervisor by the end of October.
- Submit two copies for assessment by the 31st October if you wish to graduate in the April or May graduation ceremonies or no later than 31 January following the year of enrolment. Please note, your supervisor(s) will not be available over the Christmas /New Year period.
- **Complete at least one co-authored article for publication with your supervisor.**

The format for the thesis should follow that laid out in the guidelines prepared by the University, "*A Guide to the Presentation of Theses*".

5.4 Carry forward of course work (CFCW) / Postgraduate Registration / Suspension or extension and withdrawals.

Information about application may be made for the carrying forward of postgraduate registration is in the College of Humanities and Social Sciences – Postgraduate Handbook p.46. Students can apply for suspension or extension of the length of their programme in special circumstances. The details and application forms are included in the College of Humanities and Social Sciences – Postgraduate Handbook on pages 45, 46 and 89-95.

5.5 Definition of study year

1. Full-time Students

All students enrolled in full-time 120 credit postgraduate programmes will be considered to be enrolled from 1 March until 31 January in the following year. Students may, however, take up to 28 February to complete and thereafter must apply for an extension to 31 March if they are unlikely to complete by 28 February. This means that applications for extensions for full-time students should be forwarded only in the event those students need an extension beyond 28 February of that year-see page 45 College of Humanities and Social Sciences – Postgraduate Handbook. However, to be assured of an opportunity to graduate in April (Albany students) or May (Palmerston North and Wellington students), students should submit theses by 31st October prior to the year in which the due date applies.

2. Part-time Students

With respect to part-time students enrolled in postgraduate programmes, it is expected that students will complete by 28 February in the year following their second year of enrolment. This means that for students first enrolling part-time in a postgraduate thesis in one year will have a due date of 28 February of the following year when their thesis must be submitted. Should students need time beyond this, they will need to make application for an extension which is normally 1 -2 months and in the event that the thesis is not submitted by this date, they will need to re-enrol. However, to be assured of an opportunity to graduate in

April (Albany students) or May (Palmerston North and Wellington students), students should submit their thesis by 31st October prior to the year in which the due date applies.

6. RESEARCH SUPERVISION

You will be allocated at least one research supervisor. Your supervisor may have expertise in the content area of the research you wish to undertake or may have methodological expertise. Where necessary your supervisor may ask for expert help where the content or methodological area is not her/his area of expertise. As far as possible we will try and match each student with the supervisor of her/his choice. However, this may not always be possible. You should discuss your planned research with the appropriate Programme / Group co-ordinator by October of the year before you will enrol in your research project/thesis. At this time you may be asked to provide a one-page overview of your topic, and proposed method, and you can also discuss your preferred supervisor.

The School encourages the use of agreements between the student and supervisor(s). These agreements are jointly developed. Below are some principles that need to be adhered to in the drawing up of a written agreement. The specific issues that can be adapted to suit the individual needs and requirements of the student and supervisor are also listed.

6.1 The student-supervisor agreement

Principles:

- Written agreements are preferable to verbal agreements.
- The intent is considered to be more important than the fine detail.
- It is to the advantage of both parties that the contract be signed and dated.
- Arbitration and negotiation clauses should be included.

Specifics: An agreement may include:

- Provision for a preliminary discussion with the Programme/ Group co-ordinator about your comfort/discomfort with the allocated supervisor(s).
- Attendance by both you and your supervisor at the Research Discussion days/Thesis days.
- Your seminar presentation at the Research Discussion days/Thesis days.
- Your attendance at specified workshops to ensure you have the skills necessary for successful completion of the thesis/research project, e.g. library, computer/e-mail, proposal writing, statistics.
- Planned meeting times and duration. This should include mechanisms for cancelling meetings at the last minute.
- Provisions for *ad hoc* meetings.
- The process of receiving feedback on written work. This includes how much time the supervisor requires to assess work before meetings and what the proposed turnaround time of that work is.
- Details of how much support will be given by the supervisor.
- An expected timeline for completion.
- What will happen in the planned/unplanned absence of your supervisor or if your supervisor leaves.
- Joint publication with your supervisor on completion of the thesis/project.

When you first meet with your thesis supervisor(s) it is highly desirable that you negotiate, having regard for the University's contract with students, a plan of action that is recorded in a signed and dated written agreement (see research supervision agreement appendix 10). Departure from this agreement is possible by

rewriting the agreement following negotiation between the parties involved or by decision of the Head of School. In the event that a new agreement cannot be negotiated the Head of School will determine an appropriate course of action (Note: The decision of the Head of School is final).

6.2 Meetings

It is expected that you will meet with your supervisor for at least 10 hours per year, usually on a basis of approximately one-hour per month over 10 months of the year. Some of this time may be spent in joint supervision with other students and supervisors. Meetings may be face to face or you may utilise audio or videoconferencing facilities. You may find it useful to plan your monthly meetings with your supervisor at the beginning of the year. In addition to the scheduled meetings between you and your supervisor it is expected that you will attend the Research Discussion days/ Thesis days on the campus where you receive thesis supervision.

6.3 Appraisal of Progress

Feedback on your progress will be given regularly, including during scheduled meetings and on written work submitted. A copy of the summary of the discussion, progress to date and plan of work to be completed before the next meeting (see the Individual Session Plan-appendix 10) should be retained by you and the supervisor, and used to guide your following meeting.

Six monthly reports may be completed in June and November by you, your supervisor(s) and the Programme /Group co-ordinator (see Appendix 3) and these reports provide a formal appraisal of your progress. A plan regarding progress should be developed to resolve difficulties which are identified and documented at this time.

6.4 Other Agreements

In addition to the student-supervisor agreement there are two other specific contracts/agreements the student enters into, namely the one between the University and the student and the one between the School and the student.

6.5 The University and the Student

The contract between the University and the student begins with the formal acceptance by the University of a student's application to undertake a particular course of study and the payment by that student (or the student's agent) of the appropriate fee. The governing terms and conditions of this contract are set out on p. 81 of the College of Humanities and Social Sciences – Postgraduate Handbook.

6.6 The School and the Student

The agreement between the School and the student begins with the notification of the student's enrolment in papers provided by the School. This agreement relates to the nature and amount of the School's resources that are to be used by the student while undertaking a course of study offered by the School. For example, teaching, secretarial, technical (including use of the photocopier and computers), communication resources (postage, telephone, fax) and building resources (office and meeting space)

6.7 University Grievance Procedures

Massey University's Grievance procedures are for all campuses and cover all modes of delivery of undergraduate and postgraduate programmes and related services. They are designed to ensure students receive a quality education and that relationships between staff and students are equitable. The procedures can be accessed from the University's Policy Guide at <http://www.massey.ac.nz/massey/fms/PolicyGuide/Documents/Academic/Student%20Grievance%20Procedures.pdf>

6.8 Harassment Prevention and Complaints Resolution

Massey University is committed to creating and maintaining a work and study environment that is free from any form of harassment. The University regards harassment of any kind as completely unacceptable and acknowledges that it seriously undermines the atmosphere of trust and respect that is essential to a healthy environment. See further information at http://www.massey.ac.nz/massey/about-massey/calendar/general-information/policy-statements.cfm#Harassment_Prevention_and_Complaints_Resolution

7. WRITING THE RESEARCH PROPOSAL

Your research proposal will form a plan for your research and also provide the basis of other documents, for example, applications to ethics committees and funding bodies. It is worth noting that your research proposal is a flexible set of guidelines that may well change as you proceed with your study.

Before you develop your research proposal you need to be really clear about the aims of the research. From these you may generate research questions and theoretical frameworks which shape the data collection and analysis.

A well developed research proposal requires time and considerable thought. While it can sometimes be frustrating to spend so much energy on your preliminary work, developing the proposal is a very important part of the research process. Effort spent planning your research at this time may well save you time (and trouble) in the long run.

Permission to use health facilities or involve health agency staff in your research.

If you propose to include patients, hospital and health service staff or use health service facilities in your research you will need to obtain formal permission from the Service Manager and CEO of the institution(s). All students should ensure they have discussed their proposal and sought permission from the manager of any clinical agency they wish to utilise. Ethics committees require documentation of that approval.

Your supervisor will help you shape your study and identify what is realistic in terms of the constraints within which you are working. It is worth revisiting some research texts and perhaps reading other students' proposals if you have access to them, in order to get a clear idea of what a good proposal looks like.

7.1 Suggested headings for a research proposal

- Introduction and background.
- Aims of the research / research question / research hypotheses.
- Literature review.
- Theoretical framework.
- Method/methodology.
- Participant selection.

- Data collection.
- Data analysis methods.
- Reliability, validity or credibility, trustworthiness etc.
- Ethical and legal issues.
- Budget.
- Timetable.

8. HOW TO OBTAIN ETHICS APPROVAL FOR YOUR RESEARCH

You are required by the School to obtain ethics approval from the relevant Massey University Human Ethics Committee (MUHEC) or the relevant Health and Disability Ethics Committee (HDEC) before you can proceed to collect data from human participants/subjects. You should consult with the MUHEC guidelines and checklist to enable you and your supervisor to make a decision about what committees, if any, you should apply to for ethics approval (see <http://humanethics.massey.ac.nz>). Staff involved in the Graduate Programme are available to help students and supervisors preview ethics applications before they are sent to the appropriate ethics Committees.

You will be notified by the MUHEC of receipt of your ethics application. Students from the School have found that committee members are particularly concerned about issues of coercion and any conflict of interest that may arise between the role of health professional and researcher. Address these issues in your application. The Health Research Council (HRC) accredits the MUHEC. The MUHEC website contains all the relevant information about format of applications, guidelines, dates for submission of applications and the Massey University Code of Ethical Conduct. Please note that your supervisor must agree that your application is ready for scrutiny by the Ethics Committee before you submit it.

If you need to submit your ethics application to a regional Health and Disability ethics committee you should check the dates for submission of application forms and meeting dates at:
<http://www.ethicscommittees.health.govt.nz>

10. BUDGET PREPARATION AND FUNDING

Research is expensive to undertake and complete both in time and money. Therefore, it is essential that you are sure that the project you wish to undertake is feasible, and that you are committed enough to see it through to completion. In this section there are some guidelines for preparing a budget as well as some sources of funding available. Some of the closing dates for funding applications are included although you must check with the actual organisation to confirm the dates.

10.1 Budget preparation

Some aspects to pay attention to when developing a budget for your project:

1. Don't estimate costs: find out and quote the actual costs.
2. Budget for the following aspects, if applicable:
 - Travel to supervision, Research Discussion days, and to carry out your research.
 - Conference fees.
 - Accommodation.
 - Fieldwork costs, e.g. transcription.
 - Materials and consumables – paper, printer cartridges, disks, tapes.
 - Computing costs.
 - Report preparation costs.

- Printing, copying and photographic costs.
- Library costs – interloans and photocopying.
- Telephone, tolls, facsimile, postage, email/ internet connections.
- Equipment, e.g. tape recorder.
- Koha (where appropriate).

When applying for funding please ensure that you fully cost each item so that the committee has an idea of how you came to the amount specified.

10.2 Sources of funding

10.2.1 Scholarship and Financial Support for your Studies

Look at the listing of Scholarships and Awards on the Massey website - <http://www.massey.ac.nz/massey/admission/scholarships-bursaries-awards/>. It is also worthwhile contacting any professional organisation that you belong to investigate which awards are available

10.3 Massey University Internal Funding

The School of Health and Social Services provides financial assistance to students completing research projects/theses. Please see the policy in Appendix 8. Students completing a research project are eligible for up to \$100.00 from the School operating grant. You must apply for refunds from this grant by 30 November by submitting receipts for expenses incurred. Students completing theses of 90 credits or more can apply for Graduate Research Funding (GRF) as outlined in the policy document in appendix 8. GRF funding applications (see Appendix for the application form) must be submitted by the 30th of April.

Other University funding includes:

1. Massey University Research Fund (MURF) 1 July (For staff research)
2. Research Award for Academic Women (For staff research)

11. CARRYING OUT THE RESEARCH

A research project is an individual creative process. Its subject, nature and process are, to a large extent, dependent on you, the student. However a few general points may be of assistance:

- Develop an overall plan for the report/thesis and discuss this with your supervisor as early as possible. This may be modified as the research progresses.
- Ethical and safety issues must be discussed as part of the early planning, preferably in your initial research proposal. You will then need to address these in your report/thesis.
- Prepare a timetable for submissions to:
 - Your supervisor.
 - Massey University Human Ethics Committee.
 - Other ethics committees.
 - Relevant funding bodies.
- Keep a diary throughout the life of the research including:
 - Discussions with individuals/groups regarding permission for the research
 - Memos
 - Decisions made
 - Meetings with supervisors
 - Budget expenditure

- Other developments
- Literature searched and interloans ordered

11.1 Writing the report/thesis

- Before you start writing develop a computer template of all the required formatting (see Benn & Benn [2006] in the reference list and also the Massey University *Guide to the presentation of theses* for guidance).
- Writing a thesis/research report normally proceeds in a start/stop manner - periods of high activity and periods of concern over progress. Passages of text are drafted and redrafted many times. Changes are made in the approach to the topic. Text previously thought of as important may have to be deleted as the thesis takes shape.
- There are no final rules for writing a thesis. Sometimes chapters can be written as the research proceeds. Often students feel they cannot begin to write until the research outcomes are known.
- The abstract, introduction and conclusion chapters are usually written last because they are overviews of the thesis.
- You may find that you do not meet deadlines because there is a tendency to underestimate the time the whole process will take. In addition to possible delays in the research process itself, considerable time is required to refine the whole thesis to the required standard. There should be a consistency in quality across the thesis and the final written sections should not be rushed.

Throughout the thesis development process you need to keep the following questions in mind:

- Am I answering the research question posed?
- Is the research continuing to be ethically sound?
- Is the reading relevant to the emerging outcomes?
- Can the reader understand what I am doing and saying?
- Is the evidence, including my decision trail, clearly and adequately described?
- Are the conclusions warranted?
- Does the thesis hang together?

You must also be prepared for the fact that good writing does not come easily to most of us. Writing and rewriting is a fact of life. Try to see each draft as a step further on towards a final product rather than becoming too attached to the idea that each chapter is completed as it is written.

Reading about writing and about the thesis process is helpful throughout your writing time. You may also find it very helpful simply to read good writing. Sometimes taking time out to read a novel and think about how a good author puts ideas on paper can be a most instructive (and therapeutic) activity. Try searching the library for books about writing style and so on from early in your thesis enrolment period. A number of recommended titles are included in the reference list in this package. We would be grateful to hear of any other sources you discover and would like to recommend to others.

12. PRESENTATION OF THE RESEARCH REPORT / THESIS

A Guide to the Presentation of Theses gives a range of technical advice. This is compulsory reading and is available on the Library website.

You are advised to look at a number of Masters theses in yours, and allied, disciplines. These are available in the library.

You need to discuss matters of style with your supervisor as writing begins. Please take note of the size requirements for left and right hand, top and bottom margins as set out in *A Guide to the Presentation of Theses*.

You are required to prepare your thesis on a computer using suitable word processing software. Drafts may be prepared on continuous paper and on any printer. The final copy should be printed on good quality A4 paper with good quality print. See the text: Benn K., & Benn, C. (2006). *Writing a thesis or long document using a word processor* Palmerston North: Dunmore Press. See the College of Humanities and Social Sciences Postgraduate Handbook(2011) p.7 and 8 for information on thesis presentation.

Please take particular care with spelling and grammar. Examiners will require a thesis to be revised and corrected if it contains poor expression, spelling mistakes and typographical errors.

The form of a thesis should include:

- An abstract of no more than 350 words.
- A clear statement of acknowledgements indicating the extent to which you have had assistance with the project and the ethical approval received.
- About 6 chapters which may take the following sequence:
 - Introduction.
 - Literature review.
 - Method / Description of the study.
 - Result / Outcome.
 - Interpretation / Discussion.
 - Conclusion including recommendations.
- A reference list.
- A set of appendices including raw data, correspondence, Advertisements for participants, the Consent Form (on letterhead) and Information to Participants (on letterhead), questionnaires and other tools used, and other materials which support the thesis. Please ensure that any information included in the appendices does not breach your obligations for anonymity and confidentiality of your participants.

13. EXAMINATION OF THE THESIS / RESEARCH REPORT

13.1 Research Reports (30 credit research projects)

Two soft bound copies of the reports are to be submitted to the School/your supervisor on completion.

13.2 Examination of a Research Report (30 credit)

The College Guidelines for the submission of research reports is on p. 65 of the College of Humanities and Social Sciences Postgraduate Handbook 2011. See Appendices 4, 5 and 6 for assessment guidelines for research reports.

Once the research report has been assessed your supervisor will discuss the need for any corrections/amendments to be made before two bound copies are submitted for placement in the Library if required). A soft bound copy is to be sent to the School and will be paid for by the School on receipt of an invoice. Another copy may be given to your supervisor. (This is optional).

13.3 Examination of a Thesis (120 credits)

A thesis is examined by two people:

- a researcher/scholar within the School.
- a researcher/scholar from another New Zealand or overseas University.

University guidelines for the submission of theses are on p.63 of the College of Humanities and Social Sciences Postgraduate Handbook.

14. RECOMMENDED READING

MASSEY UNIVERSITY**Research report guidelines for Master of Nursing**

Candidates presenting for the Master of Nursing are required to complete a research report based on independent work as partial fulfilment of the requirements for this degree. The research report carries a value of 30 credits. Candidates are also required to complete seven other papers, each to the value of 30 credits, the degree being completed over the period of two years full-time or five years part-time. The assessment of the research project thus comprises 12.5% of the final grade.

The research project, which may address any aspect of nursing is a focused study using a single method. The research is often a pilot project which will be extended if the student continues on to complete a PhD. The student is normally to go through the whole process of writing a proposal, gaining ethics committee approval (if required), collecting and analysing data and writing up the research report. The study may use either qualitative or quantitative methods and may be descriptive or a replication study. The student may use it to explore the use of a particular research method. Emphasis is placed on the research project as a learning experience for the student.

In recent years, most of the problems selected for investigation have been more suited to methodological approaches drawn from the qualitative range. Consequently, where appropriate, the format and style of reporting are modified, for instance to permit use of the first person rather than the impersonal third person form common in traditional scientific writing. The recommended referencing format is APA.

Research report guidelines for Master of Applied Social Work and BA Hons (Social Policy)

Candidates presenting for the Master of Applied Social Work and BA Hons (Social Policy) are required to complete a research report in partial fulfilment of each respective degree.

The research report is a low-risk student research learning exercise and usually involves a small-scale study focused on selected professional issues within social work and social policy.

Assessment Procedure for Social Work and Social Policy

The report is examined by two examiners, one of whom is independent from the study. The other is usually the supervisor. A selection of reports is examined externally in accordance with the College moderation guidelines.

Assessment Procedure for Nursing

Two examiners in addition to the supervisor(s) read the research report. Always, at least one is a nurse; one may be external to the School of Health and Social Services and usually outside the University.

Examiners reports

Examiners are asked to provide a written report which is shared with the candidate, either in full or in summary. If an examiner is not satisfied that the research report is of sufficient merit to pass, then revision and resubmission may be suggested. A pass in the degree as a whole is contingent upon a pass in the research report.

Assessment Guidelines

A student undertaking a research report is required to demonstrate a sound understanding of the conduct of research.

The design of the study, the findings and the implications for nursing should be presented in a concise report. Points suggested for consideration and comment are:

- Clarity with which the research problem/question/area of study is delineated and followed through in the research.
- Selection and critique of relevant literature (scope, depth and use made of material).
- Appropriateness and adequacy of the study design and absence of obvious methodological flaws.
- Recognition and sensitive management of all ethical aspects of the research
- Appropriateness and accuracy of the data analysis.
- Interpretation of the findings in relation to the aim and the data.
- Interpretation of the findings in relation to the aim and the data.
- Conclusions and implications clearly reflect the findings of the study.
- Referencing in terms of adequacy, accuracy and consistency.
- Overall readability and quality of presentation.

The expected length of a research report for the Master of Nursing degree is 10,000 – 15,000 words.

The expected length of a research report for the Master of Applied Social Work and BA Hons (Social Policy) is 8,000 -10,000 words.

Grading Scale

The following is the grading scale adopted within the School of Health and Social Services and is applied widely throughout the College of Humanities and Social Sciences.

Grade	%	Grade Point Average
A+	85-100	9
A	80-84	8
A-	75-79	7
B+	70-74	6
B	65-69	5
B-	60-64	4
C+	55-59	3
C	50-54	2
D	Fail	

Honours

Class of Honours	Grade Point Average
1 st Class	> 7.0
2 nd Class, Div I	<6.99 >5.50
2 nd Class, Div II	<5.49 >4.00
Pass	<3.99

Head of School, School of Health Social Services

MASSEY UNIVERSITY**Thesis Assessment at Masterate Level****(120 credits)****Background Information and Guidelines****THESIS REQUIREMENTS**

The School of Health and Social Services at Massey University is located within the College of Humanities and Social Sciences. In the case of candidates presenting for MA, MSW, MPhil, a thesis based on independent work is required as partial fulfilment of the regulations for this degree. To be eligible for award of the degree with honours/distinction it is expected that the course work, normally consisting of four papers (30 credits each) and a thesis* are completed within three years full-time or five years part-time study. The overall grade for the degree is based 50% on assessment on the thesis and 50% on results from the papers. In this context, thesis is defined broadly as "a reasoned argument supported by evidence".

The research topic for the thesis may be drawn from any aspect of nursing, rehabilitation, social work or social policy practice, education or management and therefore methodology is likely to vary from one instance to another. Descriptive studies are not precluded although students are prompted to move beyond simple description to conceptualisation and theory development. An innovative approach to problems and use of previous experience in nursing, social work, social policy or rehabilitation is encouraged. Emphasis is placed on the research process as a learning experience for the student. In recent years most of the problems selected for investigation within nursing and rehabilitation have been more suited to methodological approaches drawn from the quantitative range, whereas those within social work and social policy have been more suited to qualitative approaches. Consequently where appropriate the thesis format and style of reporting are modified, for instance to permit use of the first person rather than the impersonal third person form common in traditional scientific writing. The recommended referencing format is the APA style.

ASSESSMENT PROCEDURE

For nursing and rehabilitation theses two assessors in addition to the supervisor(s) read the thesis. Always at least one is a nurse or rehabilitationist, one is external to the School and outside the University. Social work and social policy theses are examined by two examiners independent to the research, one is usually from within the University and the other is external to the University. Massey University does not require there to be an overseas examiner at masterate level, although in developing disciplines such as nursing, social work and social policy with a fairly small local community of researchers and scholars, often this step is indicated in order to tap the appropriate expertise. Examiners are asked to provide a written report which is shared with the candidate, either in full or in summary. If an examiner is not satisfied that the thesis is of sufficient merit to pass, then revision and resubmission may be suggested. In such an instance the candidate would no longer be eligible for honours. A pass in the degree as a whole is contingent upon a pass in the thesis component.

ASSESSMENT GUIDELINES

It is assumed that criteria for assessment will address the subject matter of the thesis in the context of nursing or rehabilitation issues surrounding design and implementation of the selected method, and will take account of the overall readability and quality of presentation. In the context of nursing, rehabilitation, social work and social policy knowledge the significance of the topic and the way it has been approached, including degree of innovation and the overall contribution to health / disability/ social services knowledge, are all important. These questions are probably best answered by a practitioner in the field. However, while topic and mode of enquiry are always closely related, we would nevertheless

expect the thesis to be defensible on methodological grounds in any forum. Points suggested for consideration and comment are:

- Clarity with which the research problem/question/area of study/ is delineated and followed through in the research.
- Selection and review of relevant literature (scope, depth and use made of material).
- Appropriateness and adequacy of the study design, depth of associated understanding and absence of obvious methodological flaws.
- Recognition and sensitive management of all ethical aspects of the research.
- Appropriateness, fullness and accuracy of the data analysis.
- Interpretation (and generalisation where appropriate) of the findings, in relation to the aim, and insight into their wider implications.
- Referencing in terms of adequacy, accuracy and consistency.

GRADING SCALE

The following is the grading scale adopted within the School and applied widely throughout the College of Humanities and Social Sciences.

Grade	%	Grade Point Average
A+	85-100	9
A	80-84	8
A-	75-79	7
B+	70-74	6
B	65-69	5
B-	60-64	4
C+	55-59	3
C	50-54	2
D	Fail	

Class of Honours:

1 st Class	≥7.0
2 nd Class, Div I	≥5.5≤6.99
2 nd Class, Div II	≥4.0≤5.49
3 rd Class / Pass	<3.99

*In some circumstances a three paper thesis or equivalent project with a balanced increase in the course work may be approved. Master of Philosophy (MPhil) may be by thesis only. Final results for latter degree provide only for Distinction (equivalent to First Class Honours) and pass.

Head of School

SCHOOL OF HEALTH AND SOCIAL SERVICES

Research Supervision Statement

Date

TO WHOM IT MAY CONCERN

This is to state that the research carried out for the masters thesis/research report entitled

was completed by

in the School of Health and Social Services, Massey University, Albany / Palmerston North / Wellington, New Zealand, under my direct supervision. This thesis material has not been used for any other degree. I played the following part in the preparation of the thesis:

.....
.....

Thesis Supervisor

This is to state that the research carried out for the above named masters thesis is my own work and has not been used for any other degree.

Student

FUNDING

1. Funding

1.1 Introduction

There are two alternatives for funding available to students wishing to undertake research projects. They are *Internal funding* and *External funding*.

1.2 Internal Funding

Internal funding is available from the Operating Grant provided by the School and the Graduate Research Fund (GRF Fund) administered by the School.

1.3 External Funding

Sources for external research funds can be obtained from Research Services, Registry. You can also search the Massey website for Scholarships and Awards:

<http://www.massey.ac.nz/massey/admission/scholarships-bursaries-awards/>

2. Graduate Research Fund (GRF)

2.1 The School of Health and Social Services is responsible for the administration of GRF Funds. The fund will be assessed and allocated on an inter-campus basis. Allocation of funding will be contestable and dependent on the numbers applying and the amounts requested. All applications must be made on the SHSS-GRF form.

2.2 This funding is separate from the Operating Grant support for students.

2.3 Policy and procedures for GRF applications are as follows:

2.3.1 Those eligible for GRF funds are those students undertaking 90 or more credit research projects. Those undertaking *30 credit projects* and *PhD students with provisional enrolment* - See Section 3 (Operating Grant). PhD students may apply for funds from the GRF once full registration has been confirmed.

2.3.2 Applications will be assessed on priority of research needs. Students and supervisors will prioritise those items that are crucial to the research proceeding.

2.3.3 Access to funds granted will be conditional on ethics approval where approval is required for the research to proceed.

2.3.4 Funding will normally be allocated for consumable items, e.g. photocopying, postage, interloans, transcribing, koha, computing services, bibliographic packages, data entry, advertising for participants, telephone calls. Travel where it is associated with data collection will be funded and may include fares, accommodation and subsistence. Travel for supervision, internet connection and the costs of printing and binding theses will **not** be funded.

2.3.5. A contribution towards the cost of attending a conference may be considered for Ph.D. students who have been enrolled for at least 2 years where a paper or presentation is to be made and evidence of department and/or College support presented. Funding for conference presentations for students undertaking Masters theses will not normally be considered.

- 2.3.6 For a Masters project the maximum funding is \$750.00 per application round, with a maximum grant of \$1000 over the period of thesis enrolment. For a PhD project the maximum funding is \$1000.00 per application round, with a maximum grant of \$2,500.00 over the period of thesis enrolment. Please note the maximum amount is not an entitlement.
- 2.4 The deadline for applications is **April 30th each year** and allocation of funding will be announced end of May. Provision will be made for a second round of applications later in the year if there are funds available.
- 2.5 Access to funds will be paid on a refundable basis. All receipts must accompany payment requests. No claims will be accepted after 30 November of each year.

3. Operating Grant

- 3.1 The School of Health and Social Services has an obligation to ensure that alternative funds are available to students undertaking projects at 30 credits. These are administered as an Operating Grant.
- 3.2 Students undertaking 30 credit projects will be entitled up to \$100.00 from the operating grant toward their research.
- 3.3 PhD students will be entitled up to \$250.00 in their provisional year. PhD students are **not eligible** to apply for GRF in their provisional year of registration but may apply for funding in the subsequent years in which they are registered and fee-paying.
- 3.5 Access to funds will be released on a refundable basis. All receipts must accompany payment requests to the School Administrator. No claims will be accepted after 30 November of each year.
- 3.6 The fund covers such things as: photocopying, interloans, stationary, some travel for data collection. It does **not** cover textbooks, tape recorders, hardware, conference travel for supervision or printing and binding of theses.

**INSTRUCTIONS FOR COMPLETION OF THE GRF APPLICATION FORM
(FORM SHSS-GRF)**

**Please complete, print, scan and send one electronic copy to your supervisor for Approval.
They will then forward to the Senior Administrator, Palmerston North**

- GENERAL:**
- (a) Applications must be typed or printed clearly within the boxes on the form provided. Electronic versions of this form are available from your supervisor
 - (b) Shaded areas are for use by the School Committee/s only.
- Boxes 1 & 6:** Complete the required information for the student/project. Indicate total point value.
- Boxes 3 & 8:** Project title should be brief (maximum 30 characters) but informative.
- Boxes 4 & 9:** Summarise (from Box 13) in priority order the items for which support is requested from GRF and the sums involved. The "Decision" column will be used by the School Committee to record the funding to be granted. If the box under "Subject to Approval of Committee" is ticked, the research account will not be operational until the School has been provided with a copy of the written approval by that Committee (i.e. Human Ethics) by the applicant.
- Box 10:** Will be used by the School Committee.
- Box 11:** List previous grants from Massey University and/or the School (including GRF) that have supported this project. Be sure to specify the source of all previous grants including the amount funded.
- Box 12:** Describe the project in terms of its objectives, research methodology and the propositions/hypotheses being explored. The description should be sufficiently detailed to allow the School Committee to evaluate the quality of the research including appropriateness of design and methodology.
- Box 13:** Summarise the expected costs and proposed sources of funding by GRF, School (direct contributions) and other sources (insert names). Insert descriptors for "Items" 1-5 as appropriate to the project. These items must be in priority order (1=highest priority) to guide the School Committee in the event that only partial funding is available. Indicate on the last line ("Status") for non-GRF sources whether funding has been Requested or Approved.
- Box 14:** Explain here your request for the (up to) 5 items listed in Box 9, in terms of both how estimated costs were derived and why these items are needed.
- a) *Travel*
Applications for travel will be considered where it is necessary to visit research sites, libraries and other repositories of information, or where it is necessary to interview people in the course of the research. Detailed travel budgets, including budget fares, frequency and duration of travel, and per diem subsistence rates should be attached.
 - b) *Consumables*
Funds will be made available for the purchase of consumable items not normally available from the school, including items of equipment valued at less than \$500. Any such items will remain the property of the school after use. Students will need to check the availability of items, for example – digital recorders, with the school first for the option of borrowing before purchasing.
 - c) *Casual/temporary assistance will not normally be funded*, though a case for transcription costs or data entry charges will be considered. Priority will be given where there is a disability. It is expected that students will normally undertake the major portion of transcription of tapes.

- Box 15:** Indicate whether this project has been approved by the Human Ethics Committee, or if this is not a relevant consideration. The School Committee will, if it considers it necessary, make funding conditional on approval by the Ethics Committee, if this approval is required for the research project (see Box 4).
- Box 16:** Supervisor should comment on progress of, and prospects for, the project; priorities for funding; and any other matters that may assist the School Committee in its deliberations.
- Box 17:** Student to sign to indicate they have prepared or sighted the entire application.

These comments are to be used as a guide only. The School Committee seeks to support research in whatever way it can. There must be flexibility in the funding, and supervisors have the right to make a case for support outside the guidelines and should specify the kind of assistance they need for their graduate students. Nevertheless the expectation is that the above statements broadly define the bounds, and awards outside of them will be uncommon.

Applicants should be aware that the award of a grant will imply an undertaking on their part to report on progress as and when requested to do so by the School Committee.
