

WORLD LEADING INNOVATION

WORKING WITH YOU TO EXPAND ANIMAL HUSBANDRY HORIZONS

Just like milking sheep, you can build your supply

***But no good if what you make is
* just same old, same old (generic or commodity) so anyone can supply, or
* not really needed***

Ethos at Rurtec is to offer livestock husbandry solutions that have added features and greater benefits from using

We have invested in a bar tack sewing machine and associated equipment and have acknowledged expertise in making harnesses

So new product opportunities that can be harnessed are a great fit for Rurtec

And

***You can harness greater
returns from your sheep!***

BEARIN™

PROLAPSE HARNESS

"The harnesses are awesome. They are robust and easy to use and stop the ewe arching her back to strain. If it's a triplet ewe, saving her can mean saving four lives; three prime lambs and a cull ewe for the works – a pretty good return on a \$25 harness investment!"

Matt and Lynley Wyeth,
Spring Valley Farm
(Beef and Lamb NZ
demonstration farm
For triplet lambing,
2014 Greater Wellington
Balance Farm Environment Award Winner)

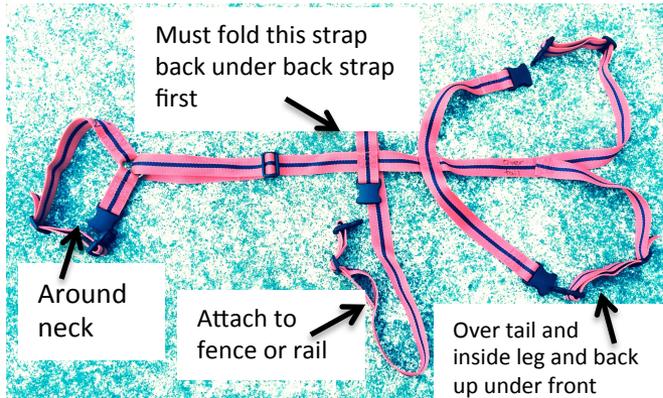

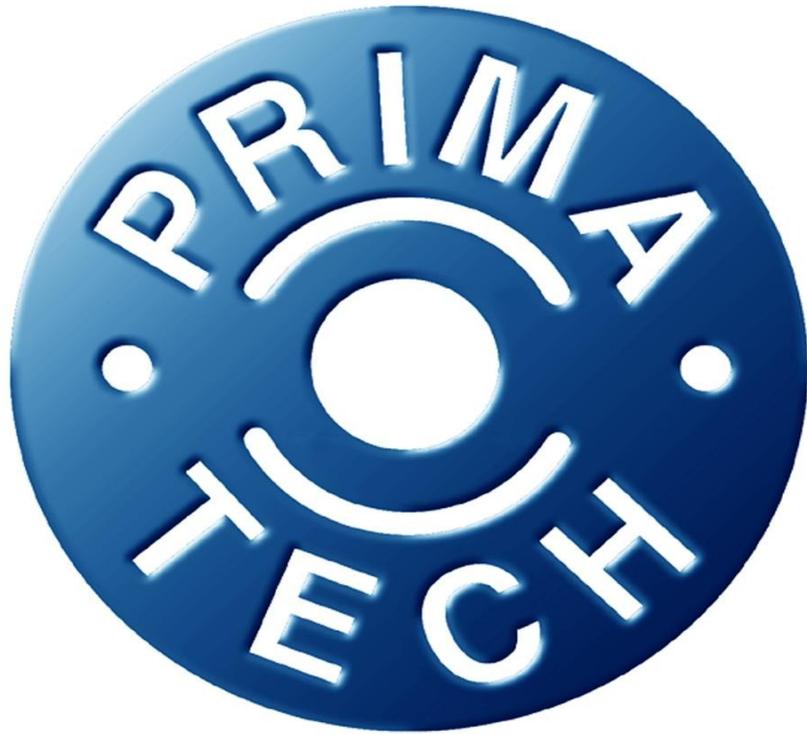

"We were very pleased with the harness - it was easy to put on and adjust for ewes or hoggets. They are comfortable for the sheep while keeping the bearing in place. We had a higher success rate of lambing ewes with bearings using the harness than with any other method we have used. The harness is reusable making it good value for money and we recommend them. The only negative we can see is the difficulty in catching the ewe to remove the harness after lambing." Robert & Lucy Thorneycroft
(2015 Wairarapa sheep & beef farmers of the year)

World Leading Automation of Tagging

"I use the FDX double tag system for lambs and I am impressed. Infection has not been an issue, and retention has been excellent with no tags lost. The tags are easier to apply and read well. In my

experience TagFaster offers the most."
Hamish Bielski, formerly at Mount Linton Station, Southland
