

Ordering Chemicals

The procedure below should be followed when ordering any chemical:

- Check for Material Safety Data Sheet (MSDS) in YELLOW LAB SAFETY folder
- If present, read and make yourself aware of any hazards and precautions necessary
- If no MSDS sheet in folder, log onto <http://chemwatch.massey.ac.nz> and print out MINI MSDS sheet
- Read and place in alphabetical order in yellow folder
- If anyone else uses the chemical, ensure that they too have read the MSDS
