The top priorities for the School of Accountancy in 2006 were to enhance student learning, perform well in research, and make a significant contribution to the profession and the wider community. It is pleasing to report that the School had a successful year in achieving these priorities. The School continued to perform well in research, make a significant contribution to the profession and the wider community, and improve its educational systems to ensure quality learning for students.

To ensure quality learning for students, the School engaged the University Teaching and Development Unit (Massey University) in a comprehensive exercise involving the review of all learning material of the School, including study and administration guides for all papers offered by the School. This exercise was very useful. Students will notice further improvements in the high quality learning material provided in the School's teaching programmes.

In line with the School's policy of improving research and teaching facilities to support students and staff, the School has recently installed new software and databases e.g., the Standard and Poor's Research Insight Databases, the DirectEDGAR Database, Micromedia Adobe Connect, video streaming online and interactive connection between the School's Web pages, WebCT and the School's Intranet.

The School of Accountancy continued to do well in research and publications in accounting and business law. In 2006, seventeen articles were published in refereed journals, including Accounting Forum, Abacus, Accounting Organizations and Society, Accounting Education: An International Journal, New Zealand Business Law Quarterly, and many other international academic journals. Four books were co-authored and eleven chapters in books were completed. Staff had a busy time presenting 21 papers in refereed international conferences in New Zealand and overseas. These conferences included the European Accounting Association Congress in Dublin, Ireland, World Congress of Accounting Historians in Nantes, France, the Annual Meeting of the American Accounting Association in Washington D.C., the Annual Conference of the Accounting and Finance Association of Australia and New Zealand in Wellington, and the New Zealand and Australasian Law Teachers Association in Melbourne, Victoria.

Three members of staff completed their doctoral studies. Dr Yuan Yuan Hu completed her PhD at the University of Wales in Cardiff, UK. Her study concentrated on environmental reporting in accounting information disclosures in the Republic of China. Nick Smith's PhD thesis was titled 'Equality as a moral, political and legal concept'. Dr Smith's thesis at Auckland University examined the relationship between basic equality and social ideals and its impact and implications on society. Dr Natasja Steenkamp's thesis, completed at AUT, Auckland, examined voluntary intellectual capital reporting in New Zealand.

Staff and invited guest speakers presented a range of papers with topics of current professional as well as academic interests in the School's Seminar Series. Together with the School's Discussion Series, the Seminar Series provided a valuable forum for the development of research capabilities and output.

The School values constructive engagement with the profession and the wider communities. Some staff members of the School have served on many professional boards and committees that include the Accounting Standards Review Board, the International Financial Reporting Committee, the New Zealand Institute of Chartered Accountants' (NZICA) Admission Board, the Academic Committee, Annual Reports Judging panels, the Public Practices Board, and the Management Board and Academic Board of Advanced Business Education Limited.

The School farewelled Professor Hector Perera who retired after more than 20 years of outstanding service to the School and the University. We welcomed two new professors to the School, Professor Michael Bradbury and Professor Asreq Rahman.

Research Support for Academic Staff

The School of Accounting views research as an important academic activity and provides generous support for staff research.

Funding

The School of Accountancy provides generous support to staff for the following:

a) funding for conferences
b) funding for scholarship, research and professional development courses
c) funding in relation to further postgraduate studies
d) funding for special individual research projects
e) funding for journal and media subscriptions

Discussion Paper Series

The Discussion Paper Series of the School of Accountancy is intended to provide staff and postgraduate students of the School with a means of communicating new and developing ideas in order to facilitate academic debate.

Seminar Series

The School's Seminar Series provides a valuable forum for local, international and in house researchers to share their research ideas, findings and policy recommendations in a variety of areas of accounting and business law by providing an informal atmosphere that allows for active discussion, the seminar series is designed to benefit not only the presenters but also the participants.

Accounting and Business Law Resource Rooms

These two Resource Rooms within the School house selected publications, some local and some international, annual reports of public companies where staff, extramural and postgraduate students can assess throughout the whole year to help them with their research.

Accounting and Business Law Links Established

A special site is established in the School's Intranet to house links to accounting and business law databases and websites, locally and internationally. Staff can use these links as a quick way of searching for information for their research.

Research Assistance

A full time Research Assistant is available to assist academic staff of the three campuses and postgraduate students in their search for information, statistical data, references and publications both manually and electronically. She helps with research administration as well as looking after the Resource Rooms above.

Technical Assistance

The School employs a full time technician to give staff software, computing and technical support. Other than commonly used software, specialised software are also available to staff to help with their research.
Research Seminar Series

The research seminars are for staff members of the School and visitors to present their current research and in this way share their ideas with, and receive feedback from the academic community as well as the wider public, including professionals. The Seminar Series provides a valuable forum for researchers to share their research ideas, findings and policy recommendations in a variety of areas of accounting and business law. By providing an informal atmosphere that allows for active discussion, the seminar series is designed to benefit not only the presenters but also the participants. In addition, for members of the Institute of Chartered Accountants of New Zealand, attendance at the Seminar Series qualifies as Structured Continuing Professional Development (CPD).

Papers are available at the venue or from the website in PDF format or from Heather Toy (Palmerston North), Glenyss Jones (Auckland), and Nikki Batten (Wellington).

Seminars are usually held on Wednesday from 12pm to 2pm. Subject to availability of a suitable time slot, the School will contribute towards travel costs and accommodation (where appropriate) for visiting speakers from outside Palmerston North or Auckland.

Equality as a Moral, Political and Legal Concept

The study is a conceptual one looking at the way the term "equality" is used and whether it is a useful term. Nicholas suggests that it is and defends the idea that all social policies must meet the threshold of equality in a basic sense that the interests of all concerned persons must be taken into account. It is a belief in this fundamental equality that explains our abhorrence of racism and sexism. Equality is not just the "formal" empty concept that "likes should be treated alike" which might be thought to need to be saved by a "substantive" equality which achieves real equality. What is morally important is that all should be treated as equals; with equal concern and respect. This basic equality has a place among other social ideals and its relationship with these is considered together with its implications.

Intellectual Capital Reporting in New Zealand: Refining Content Analysis as a Research Method

Broadly, intellectual capital (IC) refers to resources such as people, knowledge, brands, customers, technological processes, and networking systems. It is widely argued that these kinds of resources are important value drivers of businesses and in some instances the most valuable assets. Moreover, that the role that IC plays in the global economy is only going to increase in the future, and hence, stakeholders require information about IC resources in annual reports. However, current accounting regulations do not allow IC to be recognised as assets and disclosing IC in financial statements is not mandatory.

The thesis examined voluntary intellectual capital reporting (ICR) in New Zealand firms' annual reports, with a view to contribute to the development of guidelines for the identification,
measurement, reporting and management of IC. It was found that the IC resources mostly disclosed by New Zealand firms are employees, their work-related knowledge and education, brands and corporate image building. Furthermore, these firms make no attempt to report a dollar value of their IC, and 35 per cent of all ICR is presented as photographs.

The method used to examine voluntary ICR in this Ph.D. is content analysis. Several challenges such as subjective interpretations and ambiguous meanings were found while analysing the content of annual reports. It was also found that the application of some methodological issues is problematic. To promote consistency in the application of the research method when replicating ICR studies, and to enhance the comparability between ICR studies, the thesis explains how these challenges and problems could be dealt with.

**An Investigation into the Willingness of Chinese Listed Companies to Participate in Corporate Environmental Reporting**

Recent years have witnessed the emergence of high consequence global risks (i.e. global warming and the depletion of natural resources). Such environmental concerns have attracted worldwide attention, and increasing calls for corporate environmental accountability from diverse stakeholder groups. Corporate environmental reporting (CER) represents a way for companies to discharge this accountability. Whereas CER is widespread across developed countries, there is a paucity of CER in developing countries. In China, particularly, CER has remained unexplored. This study therefore attempts to fill this gap by extending the literature on developing countries to the specific context of China. The aim of the study is to investigate the willingness of Chinese listed companies to undertake CER. The study focuses on possible incentives for CER, possible reasons and causes for non-disclosure, and identifies factors that influence corporate decision to undertake CER. The study employs both questionnaire and interview surveys in order to achieve the study's objectives. A postal questionnaire was randomly distributed to 400 companies listed on China's two Stock Exchanges. Questionnaire data were analysed utilising the Wilcoxon matched pairs signed rank test to discover respondents' strength of agreement/disagreement with each question. The Mann Whitney U and Kruskal-Wallis tests were used to ascertain whether differences in company size, profitability, liquidity, indebtedness, industry type, share dispersion, corporate age, and list year had an impact on respondents' responses. The findings indicated a significant relationship between company size, industry type, and share dispersion and CER. Interestingly, companies with more concentrated ownership tended to disclose environmental information. One important implication of this study is that government will impact significantly on the substance of CER in China, and play a dominant role in encouraging Chinese companies to undertake CER.

A series of interviews were also conducted, and results revealed that only a minority of companies were undertaking CER since they are required to do so by China's Environmental Protection Bureaus. In this regard, the Chinese government is the main user of such disclosure, which is markedly different from current CER practice in the West. In addition, reporting companies devoted no more than three pages to such disclosure and "bad news" was rarely disclosed. The study reveals that Chinese companies will not undertake CER voluntarily over the next five years; as a result, government support will be a key driver if CER is to increase in the future.

The Debt Equity Distinction and Classification of Hybrid Financial Instruments

The objective is to improve understanding of the classifications adopted for the reporting of hybrid financial instruments in the Statement of Financial Performance in an environment where choice is not constrained by accounting regulations. To do this the research seeks to explain the influences on manager’s motivations to choose one classification in preference to another and to assess the effect of different classifications on the perceptions of a major group of users, shareholders. The information will be relevant to accounting regulators and will extend the body of accounting knowledge in two areas that have been of interest to accounting academics and the accounting profession. The first of these areas investigates one aspect of the forces that shape accounting practice by identifying determinants that influence accounting choices. The other investigates whether items of accounting information are relevant to investors. The research will also complement the finance literature on capital structure choice and the use of hybrid financial instruments.

Internet Technology and Issues Relating to Users of Financial Reports

Development in information and communication technology has led many organizations in many countries to consider the impact of the Internet on the delivery and dissemination of financial information (Beattie and Pratt, 2003). Corporate reports are increasingly moving from traditional printed annual report toward the worldwide electronic medium of the Internet (Bury, 1999; Nordberg, 1999; Romain, 2000). The traditional paper-based reporting paradigm will continue to breakdown and moving towards Internet reporting, changing as companies bring new technologies to the process and as information users find new ways to gather and analyze corporate information (O’Kelly, 2000; Debreceny et al., 2003; Barac, 2003).

To date, most empirical studies of the Internet financial reporting have documented the web practices of companies. Research examine on users’ perspective, however, is sparse. In light of this, this research will look into the internet technology and issues relating to users of financial reports. The relevance of this study is that in order for companies to enhance company's value, the companies need to have a clear understanding of where their value truly resides and modes by which to measure value creation so that information could be conveyed to the users.

Performance Auditing and Public Sector Accountability: A Fijian Case Study

Public sector auditing has expanded from providing an independent and professional assurance on the usage of resources by the government to a wide range of management issues including performance auditing (Burrowes and Persson, 2000; Parker, 1990). A historical analysis of the Anglo-American literature on development and emergence of public sector performance auditing indicates that there were various factors, which led to the development of performance auditing. Some of these factors are: public sector auditing profession, the changes in the legislature and statutes, calls for greater government accountability in the use of public sector resources by social and other lobby groups and, in some instances, the government itself. Literature on performance auditing has established that it is widely accepted that performance-auditing focuses on economy, efficiency and effectiveness but a clearly defined meaning of these concepts is not easily discernible. Nonetheless, advocates of performance auditing promote the view that performance auditing would improve public sector accountability by focusing on the way the public sector resources are managed.
In the Fijian context, the Fijian Audit Office implemented public sector performance auditing and then it was withdrawn. The aim of this research project is to understand the practice and the processes by which performance auditing was undertaken and then withdrawn in Fiji by the Fiji Audit Office. The research project is also aims to establish a theoretical meaning of economy, efficiency and effectiveness.

The research will be grounded in Laughlin's (1995) Middle Range Theory in which a skeletal framework for both methodology and theory are fleshed out in the context of an empirical research.

*Accounting in the Dutch East-India Company During the First 10 Years (1602-1612)*

Seventeenth century Netherland business was organised along capitalistic principles, with an emphasis on public participation, market forces and optimisation of profits. Prime amongst these business organisations was the Vereenigde Oost-Indische Compagnie (United East-India Company or VOC), which commenced operations on the 23rd of April, 1602.

The VOC’s capital, obtained by public subscription, amounted to £6,459,840 and, by the standards of the day, it was a very large and highly risky commercial venture. Its organisation allows to be described as the first public company in history.

The accounting historian’s interest in the VOC lies in its size, its geographic scope of control and its pioneering role as a public company with global interests. It can be assumed that the company’s organisation was influenced by contemporary accounting methods and, in turn, that it had an influence on the development of accountancy in general. The aim of the research is to discover and analyse these influences in the light of the context in which the VOC was established and operated during its first accounting period (1602-1612).

*Political influence, corporate governance and financial reporting quality: Evidence from government-linked and non government-linked companies in Malaysia.*

Recent well-known corporate misdeeds suggest that financial reporting quality has been questioned and is under scrutiny (Penman, 2003) and that poor corporate governance structure has been identified as one of the contributing factors to this (Claessens and Fan, 2002). In addition, political influence has also been related to the issuance of low quality financial reports (Ball et al., 2003; Luez and Oberholzer-Gee, 2003a) and weak corporate governance (ADB, 1998). Based on contingency and agency theories, the proposed study will attempt to investigate the relationship between political influence, corporate governance and financial reporting quality. Data from 1999 to 2003 of Malaysian government-linked and non-government linked companies will be used. It is hypothesized that political influence causes lower financial reporting quality; political influence causes weaker corporate governance; weak corporate governance causes low financial reporting quality; and corporate governance mediates the effects of political influence on financial reporting quality. Seemingly unrelated regression analysis will be employed to test the hypotheses. In addition, a qualitative approach (interviews) will be used to complete the triangulation design of the proposed research.

The findings are expected to empirically support previous studies on the effects of political influence on corporate governance and financial reporting quality. The proposed study will also provide insights and additional guidance for regulators and policy makers in improving the design of corporate governance features and financial reporting frameworks.

The Role of Tax Practitioners in Tax Compliance: Expectations, Identities and Behaviours

A consistent implication of prior studies on tax practitioners, conducted primarily in the United States, is that they can exert a significant influence over taxpayers in the tax compliance process. With a substantial percentage of business taxpayers using the services of tax practitioners, the type of advice provided by the practitioner is a crucial part of the system of voluntary compliance. The research focuses on the role of tax practitioners in tax compliance in New Zealand. Given the interactive nature of this type of service encounter, an examination of the role of both parties (i.e. the tax practitioner and the client) involved in the dyadic exchange, is necessary for gaining a better understanding of the role they play in tax compliance. Based on a role dynamics framework, their expectations, identities and behaviours will be examined.

The Legality of Reproductive and Therapeutic Cloning of Human Beings

Following the announcement of the successful cloning of an animal from an adult cell, the issue of whether it should be illegal to clone human beings has become the subject of much debate. The United Nations has, over the past three years, been engaged in debates as to the nature and extent of such a ban, without arriving at a generally accepted position.

It is suggested that the debates, both at UN and State level, have overlooked the fact that any such ban on cloning might itself be illegal. The paper argues that in addition to positive and negative eugenics, both of which are illegal practices, there is a third form, passive eugenics, the scope of which can be ascertained by reference to other passive laws, in particular omissions in the law of torts. A law banning human cloning would fall into the category of passive eugenics, and as such, may be deemed of no effect. Any attempt to ban or regulate cloning must strongly consider eugenic and human rights laws.
Semesters and Summer School

The Massey University academic year is divided into three main teaching periods: Semester One, Semester Two and Summer School. Most of the School’s programmes of study and papers fit into these standard semester periods although the School’s Summer study programmes have become increasingly popular. Several Accountancy papers and Business Law papers were offered in the Summer of 2007.

Internal and Extramural Studies

Some papers in the School are offered internally and extramurally. Some others are offered internally or extramurally. Extramural programmes offer opportunities for long distance study at the comfort of a student’s own environment. Extramural programmes may include contact/block courses. Contact courses are a chance for students to receive face-to-face tuition from the Paper Co-ordinator and to interact with others taking the same paper. Contact courses may be held at the Auckland, Palmerston North and Wellington Campuses of Massey University, as well as at a Christchurch venue. Some papers are offered in block mode. This means students are required to attend one or more periods of intensive study usually either in the Palmerston North or Auckland Campus.

Professional Accreditation

The School of Accountancy is accredited by the following professional bodies:-

- New Zealand Institute of Chartered Accountants (NZICA)
- CPA Australia
- Chartered Institute of Management Accountants in the UK (CIMA)

Undergraduate Programmes Offered in 2007

The School offers undergraduate programmes as follows: -

Graduate Diploma in Business Studies (GradDipBusStuds) with Endorsement e.g., Accounting or Business Law, Tax Consultancy
Bachelor of Business Studies BBS (Accountancy)
Bachelor of Business Studies and Bachelor of Science (BBS/BSc) (Conjoined programme)
Bachelor of Business Studies (without the Accountancy endorsement)
Bachelor of Accountancy (BAcc)
Diploma of Accountancy (DipAcc)
Details of Some Undergraduate Programmes

Bachelor of Accountancy (BAcc)
The Bachelor of Accountancy (BAcc) is a highly specialised degree, identifying the student as having expertise in Accountancy. It is the degree for students who know they wish to specialise as Accountants and seek NZICA membership.

Accountancy Major in the Bachelor of Business Studies (BBS)
The BBS Accountancy major is very flexible and gives students the opportunity to have a concentration in a particular area of accountancy. The student can also combine the Accountancy major with one offered by another Department to completed the BBS with a double major. Career options will be many and varied depending on the combination of papers the student chooses to take.

Graduate Diploma in Business Studies (GradDipBusStuds)
The Graduate Diploma in Business Studies is designed for students who wish to develop new or additional professional skills to open up and enhance vocational possibilities. It may be completed in one year of full-time study or over a period of time as part-time study.

Undergraduate Papers Offered in 2007

Postgraduate Programmes

The courses of study offered by the School of Accountancy at the graduate level are aimed at preparing a more independent and inquiring mind. Through their course work, students are encouraged to conduct systematic inquiry into specific issues and discover new information or relationships and/or expand or verify existing knowledge for some identified purpose.

The School of Accountancy offers graduate programmes at Postgraduate Diploma, Masters and Doctoral levels, leading to:

- Doctor of Philosophy (PhD)
- Master of Philosophy (MPhil)
- Master of Business Studies (MBS)
- Master of Management (MMgt)
- Postgraduate Diploma of Accountancy (PGDipAcc)
- Bachelor of Business Studies with Honours BBS(Hons)

Executive Insight 2006

The Executive Insight programme is run on each campus with the local branch of the New Zealand Institute of Chartered Accountants. Third and fourth-year accounting students are given the opportunity to observe and, to a limited extent, participate in the executive management of an organisation.

The programme aims to give students insight into executive roles and the commercial decision-making process, and to broaden their views of potential career paths in accounting-related roles. By comparing the “real world” with what they have learned in their studies, students come to a much better understanding of accounting as a career. Each participant works with a carefully selected host organisation over a three-day period, usually late in August.

In past years, participants have attended meetings of Boards and of Board committees; have met Chief Executives, Chief Financial Officers, and audit firm partners; have reviewed and discussed operational, financial, and tax issues; have accompanied managers on site visits; and have visited the host organisation’s branches. Participants generally speak highly of the experience, and of the helpfulness of the people in their host organisations.

Participants receive a certificate on successful completion of the programme, but usually find that the main benefits are the contacts that they make and the insights that they gain into how organisations actually work.

The contact on each campus is:
