

## The BN programme in a nutshell

This 1-page document lists all the courses that are part of the final 2 years of the current BN programme (information applies to Year 2 and Year 3 students only).

The following courses make up the nursing component of the BN programme.

### YEAR 1:

As from 2017, BN students will enrol in the new BN programme

### YEAR 2:

- 168.242: Nursing in Long-term Adaptation for Healthy Living (semester 1 or 2)
- 168.243: **Praxis II** (semester 1 or 2)
- 168.244: Promoting Health with Individuals, Families and Communities (semester 1 or 2)
- 168.245: **Praxis III** (semester 1 or 2)
- 168.246: Professional Development in Nursing (semester 1)

Focus is on long-term physical and mental health conditions, primary health care, and ethical legal issues related to nursing practice. A maximum total of 9 weeks is spent in clinical practice.

### YEAR 3:

- 168.310: Research for Clinical Practice (semester 1)
- 168.312: Issues in Clinical Practice (semester 2)
- 168.341: Nursing in Acute Illness and Trauma (semester 1)
- 168.342: **Praxis IV** (semester 1)
- 168.343: **Professional Practice** (semester 2)
- 168.344: Assessment and Clinical Decision-making II (semester 2)

Focus is on acute physical and mental health conditions including crises management. Nursing research and contemporary issues affecting the profession of nursing are explored in order to prepare students for their future role as RNs. A maximum total of 18 weeks is spent in clinical practice.

The following non-nursing papers are also part of the BN

### YEAR 2:

- 214.201: Human biosciences: Impaired bodily function (semester 1) – focuses on ‘ill-health’ (pathophysiology)
- 214.202: Pharmacology (semester 2)
- 150.202: Hauora Tangata: Maori health foundations (semester 2) – focuses on health from a Maori perspective
