

Wireless Network Configuration Guide

Mac OS X 10.6 +

Please check that you are using the **correct help-sheet** for your operating system.

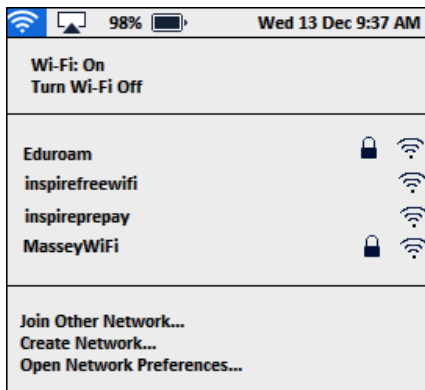

This guide covers Mac OSX 10.6+

Network Access

All users connecting to the network require Massey credentials.

- **Students:** Student ID + Password
- **Staff:** Usercode + Password

The password used is your **network password**, not Portal password

1. Click on the Wireless icon. Then select **MasseyWiFi**
2. A dialog box will pop up asking for Massey credentials. Enter your **Student ID** [or **Usercode**] into the *Username* box and your **password** into the *Password* box
3. Select *Remember this network* and click **OK**
4. You are now connected to the Massey network 😊
