

Setting up your work PC to allow Remote Desktop Connections

Work PC: Windows 7

1. Note down the IT number of your work computer, as you will need this when at home.
2. From your work computer, click on the **Start** menu and select **Control Panel**, select **System**, and then select **Remote Settings**.
3. Under the **Remote** tab, select “**Allow connections only from computers running Remote Desktop with Network Level Authentication (more secure)**”
4. Click OK

- Return to the **control panel**, this clicking on **Windows Firewall** icon.
- Down the left hand side, click Allow a program or feature through Windows Firewall

- Make sure there is a tick in Remote Desktop Domain option, then click OK

Allow programs to communicate through Windows Firewall

To add, change, or remove allowed programs and ports, click Change settings.

What are the risks of allowing a program to communicate?

Change settings

For your security, some settings are managed by your system administrator.

Allowed programs and features:

| Name | Domain | Home/Work (Private) | Public | Group Po |
|--|-------------------------------------|--------------------------|-------------------------------------|----------|
| <input checked="" type="checkbox"/> Remote Assistance | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |
| <input checked="" type="checkbox"/> Remote Desktop | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |
| <input type="checkbox"/> Remote Event Log Management | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |
| <input type="checkbox"/> Remote Scheduled Tasks Management | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |
| <input type="checkbox"/> Remote Service Management | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |
| <input type="checkbox"/> Remote Volume Management | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |
| <input type="checkbox"/> Routing and Remote Access | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |
| <input type="checkbox"/> Secure Socket Tunneling Protocol | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No |

8. Ensure your PC does not go to sleep while it's left on.

Click start->control panel

- If you are in the category view, click Hardware and Sound and then click Change power-saving settings.
- If you are in the icon view, click Power options

Click Change plan settings on the right hand side next to the plan you have selected.

Under Put the computer to sleep, choose the option Never.

Click Save Changes.

Setup is now complete, refer to separate documentation on how to connect from another computer. You may like to test this from another computer at Massey.

NOTE: You must leave your computer ON for you to be able to connect to it from home or elsewhere. It doesn't have to be logged on, just on.
