

Agriculture and Environment Internship Placement Form

Please submit a PDF of your resume and this form to apply for your internship.

Our Internship Coordinator will assign you to a placement based on the educational background and experience listed on your resume. An international internship provides you with an opportunity to take the skills you have already learned and put them into practice in a new context. Learning a whole set of new skills is not the main focus.

We will also consider the preferences you list below when matching you with a host organization. Consider the types of gear, clothing, interpersonal/technical skills, and level of physical or mental challenge you may face when noting your preferences. Your placement will be locked in and finalized before you begin your internship, but you will have an opportunity to discuss your internship with your host before you arrive.
