What have you already tried? What can you tell me about these kids?
What is the data telling you? What do the kids say? Would you like me to come and observe? What would you like me to look for? What interests these kids? Are there any times when it is not as bad? How would you describe the state of these kids when it happens? What are your theories? Tell me about the dynamics? How do these kids respond to other teachers? Do the kids know what and why they are learning this?
