COMMITTEES	i
INTRODUCTION	ii
TABLE OF CONTENTS	iii - v

GENERAL

(Being items common to both Sessions I and II of the Conference)

	Paper No.
Opening Address	
B.G. Gates, Deputy Chief Scientist, Department of Supply, Melbourne	1
WRE and the WRE Data Processing System	2
R.W. Boswell, Acting Controller, Weapons Research Establishment	
Description of WRE Data Processing System	3
W.C.J. White, Weapons Research Establishment	
Description of the AGWAC Project	4
R.W. Keats, Weapons Research Establishment	

SESSION I - PROGRAMMING AND MATHEMATICS

The WREDAC System	101
J.A. Ovenstone, Weapons Research Establishment	
The CSIRAC	102
T.M. Cherry, University of Melbourne	
The SILLIAC	103
B. Swire and J.M. Bennett, University of Sydney	
The UTECOM	104
R.G. Smart, University of Technology, Sydney	
Data Processing in Pure Research with Particular Reference to Radio Astronomy	105
T. Pearcey, Commonwealth Scientific and Industrial Research Organization, Sydney	
Machine Translation of Languages	106
A.D. Booth, University of London	
The Linguistic Applications of Computing Machinery	107
F.W. Harwood, University of Tasmania	

	Paper No.
Some Remarks on the Numerical Solution of Differential Equations M.V. Wilkes, University of Cambridge	108
Generalised Functional Round-off Error Analysis J.W. Carr III, University of Michigan	109
An Operational Method for the Study of Differential Equations R.H. Merson, Royal Aircraft Establishment	110
The Use of Continuants in Practical Numerical Analysis J.M. Bennett, University of Sydney	111
The Calculation of the Eigenvectors of Codiagonal Matrices produced by the Givens and Lanzos Processes J.H. Wilkinson, National Physical Laboratory, Teddington	112
Eigenvectors and Values of Matrices A. Jones, University of Melbourne	113
On Difference Methods of Solution of Parabolic Partial Differential Equations A.S. Douglas, University of Leeds	114
The Solution of Partial Differential Equations - A Specific Example T.M. Cherry, University of Melbourne	115
Monte Carlo Calculations of the Multiple Scattering of Muons B.A. Chartres, University of Sydney	116
On the Numerical Inversion of Laplace and Mellin Transforms J.C. Butcher, University of Sydney	117
The Automatic Design and Analysis of Biological Experiments P.J. Claringbold, University of Sydney	118
Computers and Crystallography A.S. Douglas, University of Leeds	119
SILLIAC Programmes for X-Ray Crystal Structure Analysis H.C. Freeman, University of Sydney	120
An Addressless Coding Scheme based on Mathematical Notation C.L. Hamblin, University of Technology, Sydney	121
Automatic Programming G. Hill, University of Melbourne, and J. Sanderson, Weapons Research Establishment	122
A Matrix Interpretive Routine for the UTECOM R.G. Smart, University of Technology, Sydney	123
A Two-address Method of Interpretive Coding for the CSIRAC I. Bassett, University of Melbourne	124

	Paper No.
A New Diagnostic Routine	
J.M. Bennett, and J.C. Butcher, University of Sydney, and	125
M. Chapple, Snowy Mountains Hydroelectric Authority, Sydney	
Discussion Groups on Diagnostic Test:	126
Programmes, Partial Differential Equations etc. as arranged	
during Conference.	

APPENDICES

I. PROCEEDINGS - SESSION I.

II. ALPHABETICAL LIST OF AUTHORS

III. DELEGATES
